A close-up photograph of a cluster of purple flowers, likely azaleas, with prominent stamens. The flowers are in various stages of bloom, showing delicate petals and long, thin stamens with yellowish tips. The background is a dark, out-of-focus green, suggesting foliage.

Word Study for --- WATERSPRINGS

**Psa 107:33 He turneth rivers into a
wilderness, and the watersprings into
dry ground;**

An aerial photograph of a large, circular, light-colored pond or spring. The water is a pale, milky blue or grey color, contrasting sharply with the dark, rocky, and somewhat barren surrounding landscape. The pond is roughly circular and occupies the central portion of the frame. The surrounding terrain is dark and textured, with some lighter patches that could be snow or mineral deposits. The overall scene is desolate and rugged, illustrating the concept of a wilderness being transformed into a source of water.

**Psa 107:35 He turneth the wilderness
into a standing water, and dry ground
into watersprings.**
