

A close-up photograph of golden wheat stalks, likely in a field during harvest. The wheat is ripe and has a warm, golden-brown hue. A small butterfly with orange and black markings is perched on one of the stalks in the lower center of the frame. The background is a soft-focus field of similar wheat stalks.

**Genesis 15:10 And he took unto  
him all these, and divided them in  
the midst, and laid each piece one  
against another: but the birds  
divided he not.**
