

A close-up photograph of a corn plant. The image shows several large, vibrant green leaves with prominent veins, some showing signs of being eaten. In the center and right, the developing ears of corn are visible, still partially covered by their protective husks. The background is a soft-focus field of similar corn plants, creating a sense of a healthy crop. The lighting is bright and natural, highlighting the textures of the leaves and the structure of the corn cobs.

**Genesis 17:22 And he left off
talking with him, and God went up
from Abraham.**
